Fencing/Electrical Fencing

Here at Britannia security & Maintenance we offer a wide range of security fencing and railings to provide a high level of perimeter security to your site. Included in our range is palisade fencing, Mesh fencing, steel railings etc. Whatever your site requirements are, the team at Britannia will be able to suggest to right security fencing for you.

PALISADE FENCING -

With steel spikes and an intimidating appearance, Palisade Fencing is a popular choice of security fencing for industrial and commercial sites across the UK. Made from high quality galvanised steel (meeting BS EN ISO 1461:2009 standards) and cold rolled during it's manufacture, Palisade is both lighter in weight and incredibly strong.

MESH FENCING -

Mesh Fencing is a strong and long-lasting security fencing solution which is supplied with a powder coated finish to further increase resilience. Another key benefit to using Mesh Fencing is that apertures between the wire mesh allow CCTV footage through the fencing system. With a choice of 358 Prison Mesh, 'V' Mesh and 656/868 Twin Mesh, there is always a solution to your steel fencing requirements.

Electric Fencing-

Railing systems are ideal for locations which require a low to medium level of security and where attractive boundary demarcation is needed. With a safe and stylish design, Railings are most suitable for domestic locations, as well as public areas such as parks, public gardens, commercial businesses and housing developments. Here at First Fence, we strive to meet the needs of all our customers, which is why we offer both Standard steel Railings and Self-Raking steel Railings.
